

Google exec, Mark Cuban agree that these college [skills] are the most robot-resistant

Marguerite Ward | @forwardist | Friday, 21 Apr 2017 | 4:08 PM ET

If self-made billionaire Mark Cuban was starting college right now, he'd choose philosophy as his major over accounting.

That's because [he strongly believes](#) artificial intelligence will automate many jobs involving technical tasks, such as an accountant's. Jobs that rely more on personal judgement, critical thinking and creativity — skills more often associated with a liberal arts degree — are less at risk, he says.

"Knowing how to critically think and assess them from a global perspective I think is going to be more valuable," [Cuban said](#), speaking at [SXSW](#) in March, "than what we see as exciting careers today which might be programming or CPA or
