If dogs could talk ... and take selfies

Who doesn't love scrolling through [funny dog photos](#) (pair your dog's pictures with [dog instagram captions](#) before uploading them to your socials) and tongue-in-cheek [dog memes](#) or those adorable [dog smiling memes](#)? The only thing more entertaining would be if dogs could take selfies. Imagine what your poodle might post while lounging around the house. Or the shot your huskie might take with his buds when you weren't looking.

Well, imagine no more! We asked AI to envision these selfie scenarios (an excellent use of [artificial intelligence](#), if you ask us), and the results are howl-arious.
